MEMO TO THE RECORD:

[Item No. 17 \(Alternate Service Options/Cost Analysis\)](#)

The replacement service contemplated consists of an extension of both existing HCR and Rural route service, according to whether the new delivery stops are situated along the HCR route or not. Both carriers currently case their mail at Auburn and would do so at Troy after Auburn is closed. This would add approximately 19 miles to the HCR route (the additional distance between Auburn and Troy) in addition to any extension to new delivery stops. It would add 2 miles to the rural route service due to new delivery stops; the rural carrier already travels between Troy and Auburn. However, the rural carrier would no longer have to stop to case mail at the Auburn Post Office, which would reduce the time needed for the rural carrier to serve Auburn customers by 30 minutes. The new replacement costs based on an even division of deliveries between the routes would amount to \$8105.33 [HCR 5460.31, Rural 2645.02]

The distance and cost outcomes are different from the existing \$3630 estimate of replacement service, this affects estimates in the following items:
